

New Applicator Kit

For 4100v Series Round Balers

For customers that are running the new Massey Ferguson 4100v series round balers, Harvest Tec and AGCO now have a hay preservative kit available for the baler.

The applicator consists of a re-designed 20-gallon tank that conveniently installs around the baler platform to allow easy access for installation, service, and operation on the new 4100V series balers.

Available in either the Electronic Applicator for simple, easy application, or the HayBoss Automatic Applicator that allows customers to monitor moisture and apply hay preservative automatically and accurately on their hay crop.

4100V Round Baler Applicators

HT331	HayBoss Automatic Applicator
